

Act Report Analysis

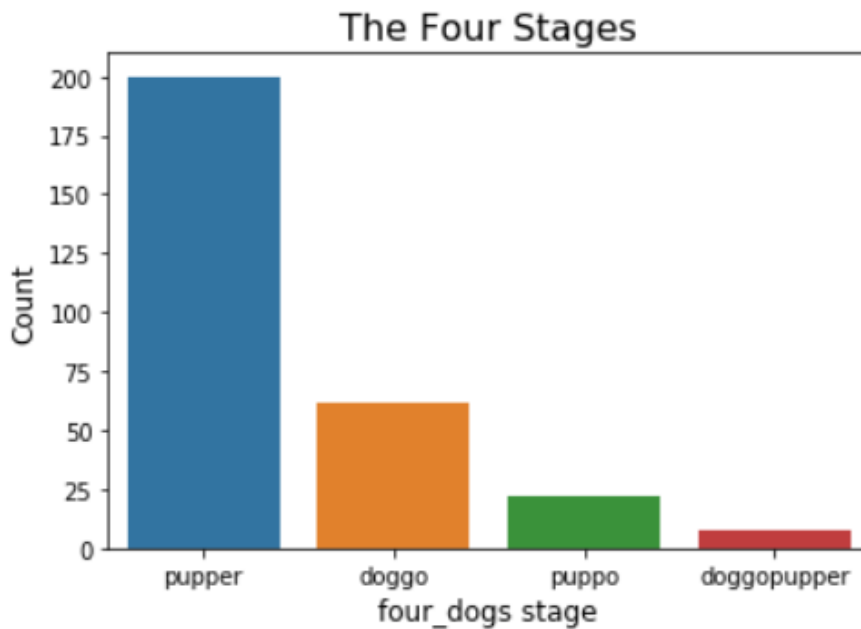

WeRateDogs™ is a twitter account that tweets out pictures of (mostly) dogs with their associated "ratings". The pic along with discription and offer a rating out of 10 for dog in the image.

We asked few questions for analysis:

- What is the most common dog?
- What is thew common rating?

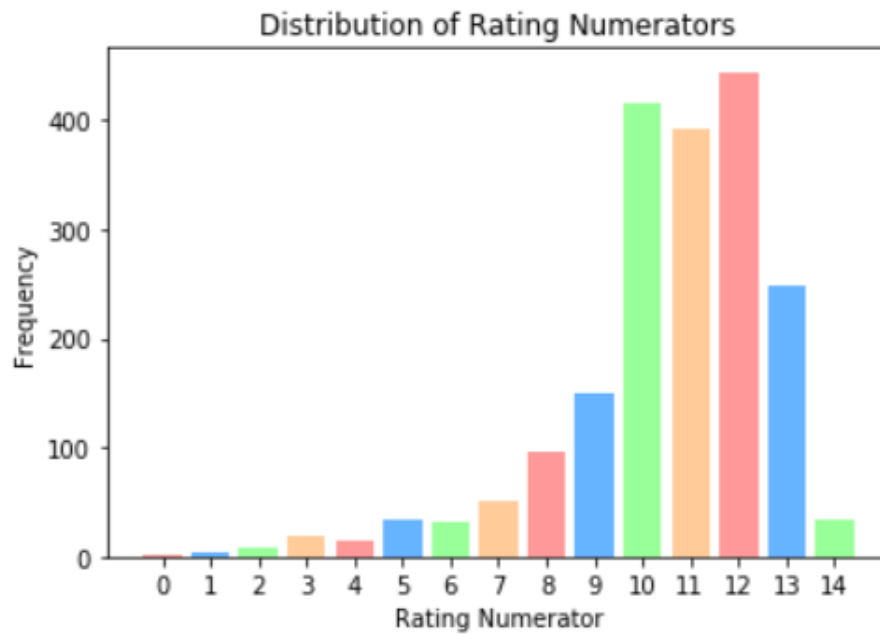

From the visualiztion I got ...

- What is the most common dog?

1. Using the bar chart as we can see there are huge difference between pupper and rest all of them. We can say pupper is the winner in WeRateDogs tweets.
2. Doggo also favorite as compare to other.

- What is thew common rating?

1. As we can see 0 to 14 rating has given and 14 is the maximum rating considered in the plot.
2. Most of the rating has given to dogs is 12. And it shown that images are given a rating between 10 to 13 which is good rating.

Thank you.
